

LEGALGPT

(An Agentic AI Framework For Intelligent Legal Reasoning, Workflow Automation And Cost Optimization)

NLP USAGE:

CONCEPTS:

- Named Entity Recognition (NER)
- Document Classification
- Semantic Search
- Information Extraction
- Text Summarization
- Legal Question Answering
- Similarity Matching

LIBRARIES USED:

- spaCy
- NLTK
- Hugging Face Transformers
- SentenceTransformers

LLMs USAGE:

CONCEPTS:

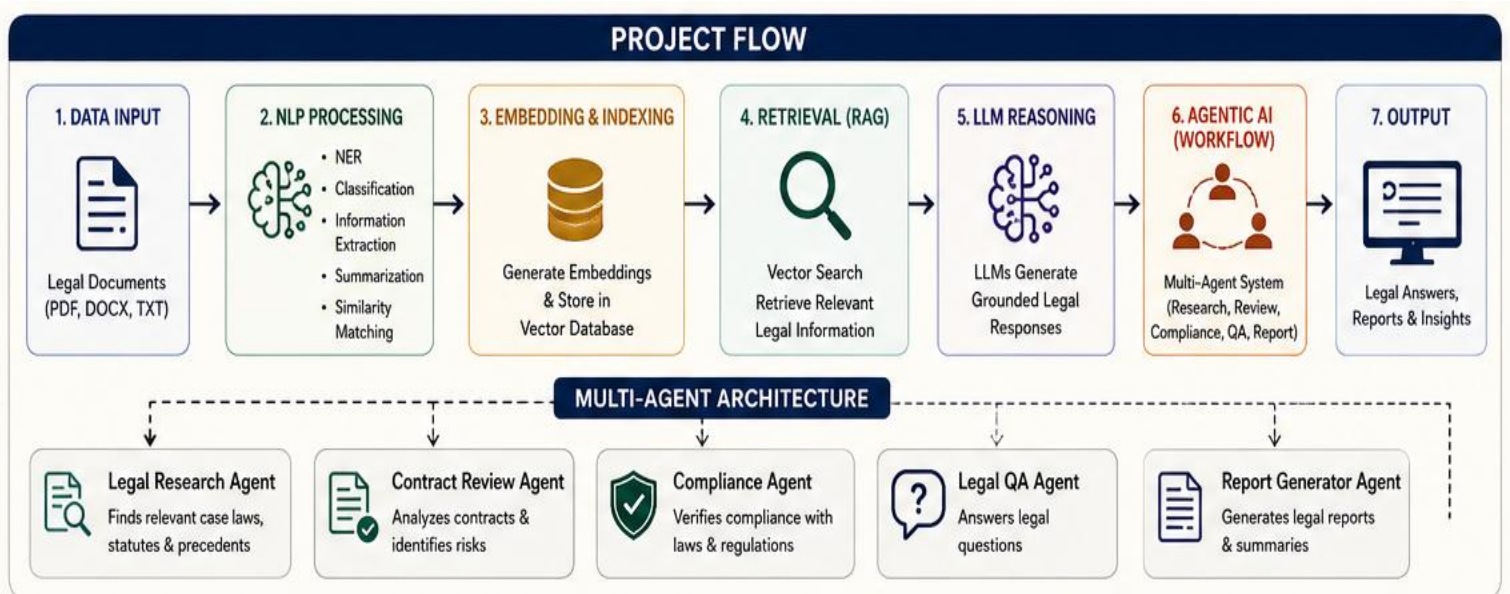

- Retrieval-Augmented Generation (RAG)
- Prompt Engineering
- Embedding Models
- Vector Search
- Multi-Agent Architecture
- Long Context Processing
- Hallucination Reduction

LLMs USED:

- DeepSeek – R1
- Llama 3.1
- Qwen 2.5
- LegalBERT

DATASETS USAGE:

- Kaggle – Supreme Court Judgements (1950 – 2024) Dataset → [Link](#)
- Indian Legal QA Dataset → [Link](#)
- Indian Legal Dataset → [Link](#)
- Indian Case Laws Datasets → [Link](#)
- Chunked Indian Legal Documents → [Link](#)
